**EXCEL S-2™**

## Specifications

Western Excelsior manufactures a full line of Rolled Erosion Control Products (RECPs). Excel S-2 temporary Erosion Control Blanket is composed of a 100% machine produced High Altitude Rocky Mountain Aspen Excelsior matrix mechanically (stitch) bound on two inch centers between two photodegradable, synthetic nets. The excelsior matrix consists of curled, machine produced fibers with greater than eighty percent longer than six inches. Excel S-2 blanket is intended for use in channels or slopes requiring erosion protection for approximately eighteen to twenty-four months and is available in natural color or dyed green. Actual field longevity is dependent on soil and climatic conditions.

Each roll of EXCEL S-2 is manufactured under Western Excelsior's Quality Assurance Program to ensure a continuous distribution of fibers and consistent thickness. Verified index properties are provided in Table 1 and product characteristics are provided in Table 2.
